

Email and Calendar

Accessible, secure and integrated enterprise-level email solution

WikiSuite includes an Email and Calendar solution. It empowers users by offering an integrated Email / Calendar / Task system within WikiSuite which helps organizations work better with email. The web-based system is compatible with any platform and operating system using desktop computers or mobile devices.

WikiSuite makes email work for your organization

The integrated email solution in WikiSuite enables organizations to achieve more with their email. The easy to manage email administration panel gives you complete control and security over email communications. It is equipped to overcome the challenges faced by email systems today such as security concerns, spam and integration with the organization's information system.
