

# Performance

WikiSuite's initial main users are small organizations and enterprise departments. However, scalability and an eventual [SaaS service](#) are kept in mind.

This is not a big concern as most [Software Components](#) already scale to huge volumes

- tiki.org has 20k+ account and has an open [Performance challenge](#)
- <http://www.elasticsearch.org/case-studies/>
- " 50,000 concurrent users in version 3.2"
- [https://wiki.freeswitch.org/wiki/Performance\\_testing\\_and\\_configurations](https://wiki.freeswitch.org/wiki/Performance_testing_and_configurations)
- Syncthing is lightweight
