

# Tiki Wiki CMS Groupware

Started in 2002, **Tiki Wiki CMS Groupware** is a web application combining the features of a wiki, a content management system (CMS) and groupware. It is the free/libre and open source (FLOSS) web application [with the most built-in features](#). It can be used to build all sorts of web applications: simple sites, complex portals, knowledge bases, intranets, extranets, and so on. The source code of Tiki is available under the LGPL version 2 software license. See also [Why Tiki Wiki CMS Groupware](#). The most powerful and flexible feature is: <http://tikitrackers.org/>

Tiki is a key [component](#) of WikiSuite.

## HomePage

### Congratulations

This is the default HomePage for your Tiki. If you are seeing this page, your installation was successful.

You can change this page after logging in. Please review the [wiki syntax](#) for editing details.

### Get started.

To begin configuring your site:

1. Log in as the **admin** with password **admin**.
2. Change the admin password.
3. Enable specific Tiki features.
4. Configure the features.

### Need help?

For more information:

- [Learn more about Tiki](#).
- [Get help](#), including the [official documentation](#) and [support forums](#).
- [Join the Tiki community](#).

# Control Panels ?

Tip

Enable/disable Tiki features in **Control Panels » Features**, but configure them elsewhere.  
See **more options** after you enable more *Preference Filters* above ( **T** ).
