Summary

Machine learning (ML) is the study of computer algorithms that improve automatically through experience.[1] It is seen as a part of artificial intelligence. Machine learning algorithms build a model based on sample data, known as "training data", in order to make predictions or decisions without being explicitly programmed to do so.[2] Machine learning algorithms are used in a wide variety of applications, such as email filtering and computer vision, where it is difficult or unfeasible to develop conventional algorithms to perform the needed tasks.

key insight include :

- First sub-topic of the webinar
- second sub-topic of the webinar
- third sub-topic of the webinar
- Fourth sub-topic of the webinar

Speakers

Overview

- **Title** : Introduction to machine learning with PHP

- **Date** : Friday, January 22, 2020

- **Time** : 5h30 PM Lubumbashi Time

- **Duration** : 60 minutes
