

WikiSuite vs Cloudrone

Cloudrone and WikiSuite have some similarities. This page is to explain the differences and rationale of choices. You likely will be interested in the other [alternatives to WikiSuite](#).

Similarities

- Both are FLOSS self-hosting platforms

Differences

Cloudrone is more about helping self-host a selection of high quality apps (with more than one option for the same use case) while WikiSuite is about offering you an integrated solution (which you can self-host)

Questions

- To move towards a unified user experience, WikiSuite is working to move all components to [Bootstrap](#). Does Cloudrone have a similar initiative?
